Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-5. (canceled).

6. (currently amended) A process for producing an additive for optical resins, wherein said additive includes organic-inorganic-composite particles having a structure including an organic polymer framework and a polysiloxane framework as essential frameworks, wherein said polysiloxane framework has a network structure, wherein said process comprises the steps of:

- ~~i) emulsifying a polymerizable monomer, then~~
- ~~ii) making particles having said polysiloxane framework absorb said polymerizable monomer that has been emulsified, and then~~
- ~~iii) carrying out polymerization involving said polymerizable monomer absorbed in said particles having said polysiloxane framework~~
- i) emulsifying a polymerizable monomer,
- ii) absorbing the resulting emulsified monomer into particles having a structure including a polysiloxane framework, and
- iii) polymerizing the emulsified polymerizable monomer in the particles.

7-14. (canceled).
